

Aradhana Dinakar Joshi

Java Full-Stack Developer | +91 7676836143 | Bengaluru, India | aradhanajoshi498@gmail.com | linkedin.com/in/joshiaradhana | github.com/AruJoshi

PROFESSIONAL SUMMARY

Results-driven Java Full-Stack Developer with nearly 4 years of experience architecting scalable Spring Boot microservices and React.js applications for enterprise clients. Proven track record of reducing production downtime by 30%, accelerating API performance, and strengthening system reliability through clean, test-driven code. Skilled in end-to-end SDLC, RESTful API design, database architecture, and Agile delivery, with hands-on experience mentoring peers through code reviews and driving cross-functional collaboration. Seeking to bring strong backend engineering and leadership instincts to a high-growth product engineering team.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript, TypeScript, React.js, jQuery, Bootstrap

Back-End: Java, J2EE, Spring Boot, Spring MVC, Spring Security, Microservices, RESTful APIs, MySQL, H2, Design Patterns

Tools & Platforms: Git/GitHub, Docker, AWS, Jenkins, CI/CD, JIRA, SonarQube/SonarLint, Postman, Maven, JUnit, Log4j, SLF4J, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

Mar 2025 - July 2026

Smart Data Solutions, Chennai, India

- Architected and deployed production-grade Java Spring Boot microservices across multiple client platforms, strengthening backend stability and accelerating feature delivery.
- Diagnosed and resolved critical production defects, cutting system downtime by 30% and improving deployment reliability.
- Optimized RESTful API performance and backend workflows, accelerating data processing and reducing response latency.
- Partnered with cross-functional engineering and product teams to design scalable, client-aligned solutions.
- Enforced code quality standards using SonarQube, reducing production defects and improving maintainability.
- Led Git-based version control and integration governance, managing and reviewing 300+ merge requests in an Agile environment.

Junior Software Engineer

Jan 2022 - May 2024

Cognizant Technology Solutions, Bengaluru, India

- Engineered 2+ full-stack web applications by integrating 10+ RESTful APIs using React.js and Java Spring Boot, boosting data retrieval speed by 20%.
- Designed and implemented 5+ normalized database schemas, executing CRUD operations across MySQL and H2 in-memory databases, improving data accuracy by 15%.
- Authored 100+ unit and integration tests with JUnit, raising code coverage to 85% and cutting production bugs by 30%.
- Strengthened application security by implementing JWT-based authentication and authorization with Spring Security, safeguarding 1,000+ user accounts.
- Collaborated within a 7-member engineering team using Git, ensuring seamless feature integration in an Agile/Scrum environment.
- Championed code review best practices, lifting team-wide coding standards and engineering efficiency by 10%.
- Streamlined testing, logging, and project tracking using Postman, JUnit, Log4j, SLF4J, and JIRA, improving development efficiency by 15%.
- Built cloud-native microservices using Spring Boot and Feign Client, improving inter-service communication speed and reducing system latency by 15%.

EDUCATION

Master of Computer Applications - KLE Institute of Technology, Hubli, Karnataka

Sep 2021

CGPA: 8.72 / 10
